Education & Self-Learning

Programming Courses - 2023 - 2025

Self-taught developer, completed various programming courses

Smart Contracts Development - 2021 - 2023

Learning smart contract development and Chainlink tools

Skills

Programming Languages

Primary: Python, JavaScript/TypeScript, Solidity, HTML/CSS

Secondary: Lua, Bash

Technical Skills

Blockchain Development, Smart Contracts, Web3, Node.js, React, Next.js, Telegram Bot Development, API Integration, Database Management

Soft Skills

Development, Project Management, Team Leadership, Problem Solving, Communication, Adaptability, Self-Learning

Professional Experience

Full Stack Developer - 2024 - Present

Developing full-stack web applications with focus on performance optimization and user experience. Building scalable applications using modern technologies, implementing deployment pipelines through self-learning and experimentation. Achieved significant performance improvements through iterative testing and optimization.

Blockchain Engineer & Smart Contract Developer - 2023 - 2024

Self-taught blockchain development, specializing in secure smart contracts using Solidity. Learned to integrate Chainlink oracles and DeFi protocols through documentation and hands-on practice. Built multiple blockchain projects by experimenting with different approaches and learning from mistakes.

Freelance Developer - 2022 - Present

Providing development services including web applications, automation solutions, and AI integration. Learning new technologies as needed for each project, adapting quickly to client requirements through self-study and practical implementation.

Self-Taught Developer - 2018 - 2022

Started programming journey through online resources and documentation. Learned web development fundamentals, modern frameworks, and development methodologies through trial and error, building various personal projects.

Languages

Russian - C1
Estonian - B2
English - B2

Hackathons

Chainlink Constellation Hackathon 2023

Developed "DynamicAI" - a blockchain-based AI solution. Project focused on integrating AI with blockchain technology for dynamic content generation and management.

Chainlink BlockMagic Hackathon 2024

Created "OnChainTTT" - a decentralized Tic-Tac-Toe game on Polygon blockchain. Implemented Chainlink VRF for provably fair randomness and automated game state management.
